nationalgrid

Natural Gas Supplies at Risk in NYC and LI. We Need Your Support!

National Grid does not have enough natural gas supply to keep up with the current growth rate in New York City and Long Island.

To support this growth, approval of the Northeast Supply Enhancement (NESE) Project is needed to access the additional natural gas supplies required to support our region.

Without NESE, National Grid will not be able to supply natural gas to new commercial, industrial and residential customers to heat our homes or run our businesses, putting the region's economic growth at risk, as well as impeding state and city carbon emission goals.

Please act by July 13 and tell the NY Department of Environmental Conservation (NY DEC) that you support the approval of NESE.

Please email your note of support to Ms. Karen Gaidasz at NESEproject@dec.ny.gov or through U.S. mail to:
